

VENUS COIN WHITE PAPER

The First Living Canine Deployed as an On-Chain Digital Asset

Executive Summary

VENUS is the first premium digital asset released under the Maya Meme's framework, introducing a new category where real-world identity, brand provenance, and blockchain infrastructure converge.

The Vision

Maya Meme's transforms memes into evolving digital assets with identity, structure, and long-term community value.

The VENUS Thesis

A living origin model, corporate-aligned supply, and a premium launch structure replacing the traditional hype-cycle meme token.

Token Architecture

Token Standard: ERC-20

Token Name: Venus

Symbol: VENUS

Total Supply: 500,000,000

Contract Address:

0x50EaE8c782D476386C271DBee094Bf6B2040130C

100% of the supply was minted to the UK Financial Ltd treasury for structured distribution.

NFT Identity Layer

1 Genesis NFT – The living origin

99 Founders Tier NFTs

400 Core Tradable NFTs

Dual-asset economy: fungible token for liquidity and NFTs for identity and scarcity.

Market Formation Model

Controlled access phases, fixed participation structure, and disciplined liquidity events designed to reward long-term alignment and prevent launch volatility.

Ecosystem Integration

Aligned with the UK Financial Ltd digital asset infrastructure, the Maya Meme's ecosystem, and future exchange trading environments.

Roadmap

Phase 1 – Liquidity event
Phase 2 – Public trading
Phase 3 – NFT marketplace integration
Phase 4 – Character expansion

Community Model

VENUS represents protection, strength, loyalty, and fearless community energy.

Long-Term Vision

To establish the Living Digital Asset category where real-world presence and blockchain merge into a permanent, tradable asset class.

Conclusion

VENUS is not a meme launch. It is a new digital asset model and the expansion of the Maya Meme's economy.
